

Walgreens supports oncology specialists by taking care of the whole patient, not just their condition.

It starts with extensive access to limited-distribution drugs, faster speed-to-fill, improved adherence, and personal support from oncology-specialized pharmacists. See how a holistic, team-based approach to oncology pharmacy care seamlessly supports patients from diagnosis through survivorship.

Discover how Walgreens cares for the whole patient.

Comprehensive, *personal support* through every stage of the cancer journey.

1 Onboarding •

Patients receive a personalized welcome text with pharmacy information and cancer resources. Upon patient consent, the financial services team proactively identifies programs to help patients manage medication costs.

2 Beginning therapy

Therapy starts quickly with ~2-day average fulfillment time from oncology-specialized pharmacies¹. An oncology-trained pharmacist educates the patient on side effects and digital adherence tools, while connecting them to relevant advocacy groups.

\$536M in financial assistance support secured for eligible patients in 2024.

3 Ongoing treatment -

Oncologist is kept notified of patient's ongoing care. Monthly clinical assessments monitor adherence, and patients have access to nutritionists and specially trained beauty and wellness consultants to make treatment more manageable.

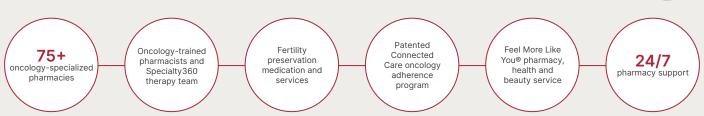

4 Survivorship

Patient receives periodic check-ins to monitor maintenance medications with the continuous support of pharmacy programs and an oncology-trained pharmacy team.

61.3% of older patients with cancer have other serious health issues requiring additional medications.²

This is care for the whole patient.
