

How MNA Staff Support Committee Proposal Development

Turning Member Ideas into Statewide Action

Strong committees begin with strong ideas, and MNA staff are committed to helping members bring those ideas forward with confidence. Whether you already have a fully formed concept or are just beginning to explore a need you've noticed in your nursing community or practice, staff are ready to guide you through every step of the proposal process.

What Support Looks Like

- **Clarifying Your Idea** – Staff helps you refine your concept, identify the core purpose, and connect it to statewide needs.
- **Aligning With the MNA Mission** – Every committee must support MNA's mission. Staff works with you to ensure your pro-

posal reflects that alignment clearly and effectively.

- **Structuring the Proposal** – Staff assists with organizing your proposal into a clear, Board-ready format, including purpose, goals, anticipated outcomes, and resource considerations.
- **Strengthening the Rationale** – Staff helps you articulate why your committee is needed, how it benefits nurses, and how it contributes to statewide strength.
- **Preparing for Board Review** – Staff guides you through what the Board looks for, how decisions are made, and how to present your proposal confidently.

Why This Support Matters

Member-driven committees are essential to MNA's statewide impact. Staff support ensures that:

- Your idea is clearly communicated
- Your proposal is mission-aligned
- Your committee has a strong foundation for success
- Your voice is fully represented in the process

When members and staff collaborate, proposals become stronger, more strategic, and more likely to create meaningful change for nurses across Maryland.

Ready to Begin? Your Idea Could Strengthen Nursing Across Maryland

Every statewide initiative begins with a nurse who sees a need and chooses to act. MNA staff are here to help you turn that spark into a proposal and that proposal into a committee that supports nurses throughout the state. Contact us at [MNAInfo@](mailto:MNAInfo@MarylandRN.org)
